

## **TASK 4 :**

**Prepared by: KISHORE S**

**Title: E-Commerce Website**

### **Kishore Elite – Stylish E-commerce Web App**

#### **Final Project Report**

##### **1. Introduction**

Kishore Elite is a sleek, real-time e-commerce website that mimics modern platforms like Flipkart and Amazon. Built for a premium shopping experience, it allows users to browse, search, and add products to a cart with dynamic interactivity.

##### **2. Key Features**

- Live Product Display** – Products dynamically rendered using JavaScript
- Stylish Interface** – Modern layout, hero section, category cards, and animations
- Interactive Shopping Cart** – Quantity controls, real-time total, remove items
- Responsive Design** – Fully mobile-optimized UI
- Notification System** – Toast messages on cart actions

##### **3. Technologies Used**

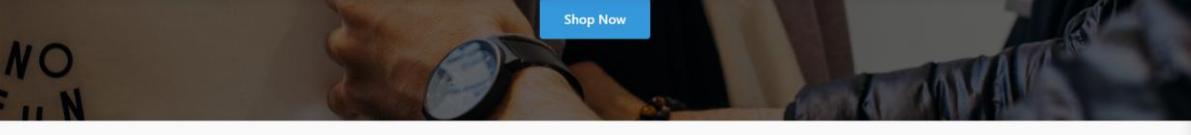

<b>Technology</b>	<b>Purpose</b>
HTML5	Structure of the pages
CSS3	Styling, layout, responsiveness
JavaScript (ES6)	Dynamic product rendering, cart logic
Font Awesome	Icons for search, cart, etc.
Unsplash/Flipkart Images	Realistic product visuals
Visual Studio Code	Code editing
Chrome	Browser testing

## 5. Output / Result

- Smooth UX with modern, animated layout
- Mobile-friendly shopping interface
- Fully functional cart logic with interactivity
- Ready to be integrated with backend/database

## **7. Conclusion**

This project successfully delivers a stylish, interactive shopping experience. It showcases dynamic content rendering, real-time cart management, and a responsive layout tailored for modern users. “Kishore Elite” stands as a refined e-commerce model with scope for expansion.
